MINE MANAGER'S TRIAL FOR HUGHES SLAYING IS BEGUN

**Woman Also Charged in
Knott With Poisoning of
Deputy Sheriff**

CYANIDE IN BEER

Trial of James Compton, manager
 of the Wells-Eldboro' Coal Mine, on
 Jones' Fork, charged with the murder
 of Adam Hughes, last August
 was under way in the Knott circuit
 court, this week.
 Hughes was found fatally wounded
 on the railroad tracks near the
 Compton home, and for a time au-
 thorities were baffled by mysterious
 angles of the case. Hughes was a
 well-known mountain "boulder," and

PRODUCTION CREDIT
ASS'N IS ORGANIZED

Eleven Counties in Big Sandy Group; Ready to Receive

Applications
Floyd Arnett, president, and Powell Collins, secretary of the Big

Sandy Production Credit Association, returned Saturday from Louisville. The association was recently formed

to make working capital loans to the farmers of the counties of Floyd, Pike, Ku Klux, Johnson, Morgan, Magoffin, Elliott, Lawrence, Martin, Boyd, Letcher and Menifee counties. The Production Credit Corporation of Louisville, the parent organization of all these associations, had called in the officers of the associations in Kentucky, Indiana and Ohio for a three-day's schooling in their duties.

When a farmer makes application for a loan, the secretary sends an inspector out to appraise the chattels offered as security. At this school, in-

Mr. Collins said last week that the local association expects to be ready to receive and act on applications by March 19.

SAMPLES and address of the
tore of the association are:
Floyd Arnett, West Liberty, Ky.;
S. O. Arnett, Sublett, Ky.; George W.
Spears, Riceville, E. M. Moore,
Hindman, Ky.; James W. Caudill,
Loudon, Ky.; Erminas Proctor, Ind.
Ky.; Fred P. Cole, Rush, Ky.; R.
Moore, Eastern, Ky.; Ken Smith,
Cauda, Ky.

day and Thursday, March 28 and 29, hours 10 a. m. till 7 p. m. Some of the samples to be given away are: rice, flour, soda, cookie cutters, canned goods, tooth paste, thread, sieves, powder and many other articles.

GARRETT

DANCE PARTY

A six o'clock dinner was given Thursday evening, March 16, at the home of Mr. and Mrs. Alex Wallen in honor of the Garrett school. Those present were H. N. Cooley, Mr. and Mrs. C. H. Farley, Messrs. Curtis Owens, Arnold Cooley, and W. R. Mayo. Miss Audrey Sturgill, Miss Lafayette, Mr. and Mrs. Raymond Turner, Miss Leslie Allen, Miss May De-rossett, Miss Edith Patton, and Mr. Wallen's family. All report a nice time and a good dinner.

MORILL GRANTED SALES RIGHTS ON ELECTROLUX

Forgers' wires in the vicinity of Prestonsburg and other parts of Floyd county now have the opportunity of attaining themselves of the latest scientific triumph in bringing the farm kitchen up-to-date, an Electrolux refrigerator that is operated by a kerosene flame, the sales rights of which for this territory have been granted to Morrell Supply Company here.

Awarding of the franchise to sell Electrolux kerosene refrigerators in Prestonsburg and vicinity was announced by E. R. Bellamy, vice-president of Electrolux Refrigerator Sales, Inc., from the company's eastern headquarters, 11 Park 42nd st., New York city. Other nearby counties where the Electrolux kerosene refrigerator will be merchandised are Pike, Martin, Johnson, Jackson, Knott and Johnson.

Electrolux kerosene refrigerators are manufactured by Societ, Inc., at Frammville, Indiana, and are the counterpart of the Electrolux gas refrigerators, manufactured by the same company, over 400,000 of which are in use in cities and larger towns all over the United States.

Like the gas refrigerator, the kerosene refrigerator is all-steel, and contains all the other features which give the Electrolux gas refrigerator its high standing in the field of modern household refrigeration.

FORD SALES IN WAYNE, MICH., THREE-GRADE THAN COMETING CARS

Detroit, Mich., March 10.—In Wayne county, Mich., which includes Detroit, home of the automobile industry, sales of Ford V-8 cars in February were more than three times as great as those of any other make in the low-price field. It was revealed in registration figures compiled by R. L. Park & Company.

During the 28 days of the month a total of 2,208 Ford V-8s were sold in the county, an official tabulation revealed.

Wayne county registrations are considered especially significant because they are believed to reflect the automotive buying trend for the entire United States.

The Dearborn branch reported that Ford dealers in the county have predicted an even greater figure for March, basing their statements on an increased demand evident in the first few days of the month.

PRODUCTION CREDIT READY FOR FARMERS

Kentucky farmers are now accorded the assistance of 12 Production Credit Associations, organized with capital furnished by the Federal Farm Credit Administration. Money may be obtained from them for financing farm operations. Each association has a secretary-treasurer to whom applications for loans should be made.

Headquarters for associations are at Danville, Elizabethtown, Flemingsburg, Glasgow, Hopkinsville, Lexington, Louisville, Mayfield, Owensboro, Paducah and Paducah. Walter F. Gahn, Louisville, is president of the Production Credit Bank of the fourth district, which supervises the production credit associations. Organization of the credit associations was recently completed through the assistance of Dr. L. J. Norton, Washington, D. C.; J. Walter Brown, Louisville, and C. J. Bradley, College of Agriculture, University of Kentucky.

Modern Orchestra Goes Back to Bow and Arrow

Musical instruments as we know them today are as old as the hills, but the modern orchestra is a fairly recent development scarcely 100 years old, says a writer in the Kansas City Star. While the short span of the modern human imagination has found many widely differing modes of expression through music, the conception of song melody and instrumental melody has changed radically; the various musical instruments have undergone vast improvements and none have definitely been relegated to the museum. But throughout this entire period the orchestra has been undergoing a fascinating evolution.

The modern orchestra may be said to go back to the bow and arrow as its starting point. For the orchestra, as we know it, was built around the string quartet; and the string quartet was composed of the violin family. Musicologists assume that the origin of the violin may be traced to the time when primitive man is letting fly the bow from the arrow head the sound made by the bow string. Slowly and painfully this primitive idea was developed until it found its perfect expression in the Cremona and Gernanius violins. A moment's examination of the violin will convince the observer that the instrument is in principle the same as the bow which the hunter used.

Similarly, in the case of the flute, the assumption is that a primitive shepherd in tending his sheep heard the wind blowing across the end of the reed. Thus we see that in the case of the orchestra it is the unpredictable leaps of the human imagination that have led to its development, and that its origins go back to the roots of human nature.

No Other Sport Equals That of 'Coon Hunting

There is a strange appeal to 'coon hunting that can be compared to no other sport. There is a cleanliness among 'coon hunters, too, says an authority in the Detroit Free Press, that bears evidence of the uniqueness of this type of enjoyment. More important than the 'coon by far, is the dog, for without a dog there would be no 'coon chase, no music, no thrill of 'hacking up' no astounding dog's way through the night-blanketed woods.

Following the hound whose nose is a hundred times keener than the human. Within the past few years, 'coon hunting has been developing more and more as a sport and less as a skin-getting game. It is true that the 'coon pelt does play a part in the economy of the 'coon hunter's life, but he considers their catch less as a money crop than as a source of ready cash with which to purchase and maintain their dogs. This seems to be the attitude among the 'coon hunters, and with the development of a more 'sporting' attitude, comes the greater enjoyment of a prolonged chase. Of course, the destruction of den trees is out of the question, as well as against the law, and the climbing of trees to get out the 'coons is frowned upon by every self-respecting 'coon hunter.

Let the night be dark, and follow a rain, when the fog hangs mist against the earth's surface. That is the time when dogs are at their best, for the moisture holds the scent.

Natural Ice Caves

According to Helliwig's Geology, there are a hundred or more known ice-caves in the temperate zone of both the Old and New world, and especially developed in mountainous districts, such as the Alps, Carpathian, Tatra and Ural mountains. One of the largest and most beautiful of these is the Polichan cave of northern Hungary, near the foothills of the Carpathians (now Dobosin in Czechoslovakia). Its area is about 10,000 square yards, 8,200 of which are covered with ice of crystalline purity, many of the blocks assuming fantastic shapes. Another large European ice cave is the Kolovrat cave, near Salzburg, Austria. Probably the best-known ice cave in this country is the one at Connersport, Pa., but others have been found in Iowa, South Dakota, Michigan, etc. There are subterranean dwellings known also as earth lodges or souterrains. In many parts of Europe as well as in this country; it is probable that some of these are still to be used as dwellings.

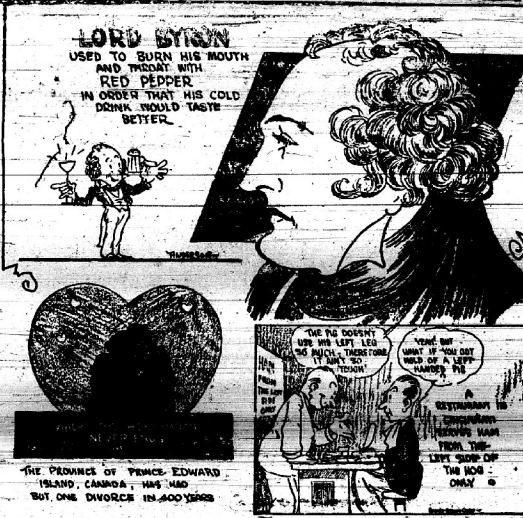

Tassel Growing

One of the curious crops grown in England and in Europe is the tassel. The tassel is used for raising the nap on the best cloth and blankets, so machinery having been necessary to cut the tassels for the purpose so well. Tassels are the downy heads of the plant of that name, and are very pretty, having long, straight bristles all over them. The cultivation of this plant has been carried on for centuries chiefly in Somerset and Gloucestershire. The journey to the Yorkshire mill used to take as long as a week or ten days in olden times and was a dangerous undertaking owing to the footpads who infested the highways.

Origin of Knives and Forks

The knives we use at our meals are the successors of the earliest hunting-knives which the men of long centuries ago found so handy for cutting their food, and the blade of which was a duplicate of our straight razor. The carving-knife, in those days the fingers were used as forks; and it was only in 'Tudor' times, when the enormous ruffes worn then made it difficult to reach the mouth with the fingers, that it became necessary to discover a substitute in the crude parent of the modern fork.

COOK ELECTRICALLY in Wonderland

EVEN if it were always tea-time, as the Mad Hatter protested, the modern Alice could cook in Wonderland while she was far from home. . . . At a Tea Party, perhaps, while on her Electric Range "beautiful soup, so rich and green" waited to be served, and tarts were baked so deliciously that the Knave of Hearts stole them away.

It is like Wonderland to cook with a modern Electric Range. Just turn on a switch, set a clock, and forget! At the proper time, you may appear, a refreshed and charming hostess, ready to serve a perfectly cooked meal.

Floyd Farm Loans
Approach \$50,000

County Still Behind Neighboring Counties in Applications for Loans

Twenty-four farm loans totaling almost \$50,000 have been granted to Floyd county farmers, according to the secretary of the Magoffin National Farm Loan Association.

This money is being advanced by the federal government to aid farmers whose farms are in need of improvements or are encumbered by indebtedness. Edward D. Holbrook, secretary of the association, said a few days ago that Floyd county is far behind neighboring counties in the matter of applications made for loans.

Mr. Holbrook has changed the location of his office from the postoffice

building to the law offices of Bond & Bond, in the L. O. O. F. building on First avenue. He will be here each Tuesday till further notice for the purpose of receiving applications and of closing loans.

SERVICES CONTINUE, THO CHURCH IS IN DARKNESS

After continuing through Monday evening's services, the revival at the Irene Cole Memorial Baptist Church here evidently is in little danger of interruption.

For throughout the hour for service Monday, the "burning" system here was completely disrupted by the heavy sleet. This, however, did not dismay the pastor, the Rev. Josef Nordenhau, who, evidently, is not in the least afraid of the dark. He quoted the scripture lesson from memory, the pianist and choir rendered the music as usual and the pastor went ahead with his sermon undisturbed.

WEEKSBURY

The Ladies' Missionary Society gave a farewell party Saturday night at the home of Mr. and Mrs. E. E. Tubridy in honor of Rev. Homer Clouser, and Mr. Frank Penny. Several games were played and delicious refreshments were served. All plates were decorated in keeping with St. Patrick's Day.

Those who attended were: Mr. and Mrs. Shupe, Mr. and Mrs. Clyde Donaldson, Mr. and Mrs. Ruth Smith, Mr. and Mrs. J. S. Hinkle, Mrs. Thelma Channing, Mrs. G. E. Ratliff, Mr. and Mrs. Chas. Hamilton, Mr. and Mrs. Clarence Kline, Mrs. Clarence, Mr. and Mrs. B. R. Osborne, Misses Mary Morehead, Dorothy Clouser, Eulah Mae Seiser, and Henry Horton.

Misses Dorothy McKelip, Gladys Short, Edith Hiles and Edwin Kline motored to Lexington Friday to visit Miss McKelip's friend, who is ill.

Dr. Muske's wife is very ill. We hope she will recover soon.

Mr. Clouser has as his guest his mother and niece from Cleveland, O. He expects his father, who will conduct special services on Tuesday, Wednesday and Thursday nights.

School was discontinued for several days owing to the deep snow. However, the teachers are making it up by teaching on Saturdays.

We regret to report that Sunday School has been discontinued for two Sundays owing to the whooping cough epidemic.

Mr. and Mrs. Rella Chaffin, Mrs. D. E. Chaffin and daughter, Faye, motorist of Monday in Ironton, Ohio, where Mrs. Chaffin is under the care of Dr. Marting.

B. Osborne, Jr., was the Friday night guest of Jones Seiser.

We seem to have the moving fever here. Mr. and Mrs. J. C. Babb moved into their new home on the hill. Mr. and Mrs. Orville Oney moved into the house vacated by Mr. and Mrs. Babb, and Mr. and Mrs. Shirley Cort into the house vacated by Mr. Oney. Mr. and Mrs. S. E. Ratliff, also Mr. and Mrs. Chas. Hopkins have moved into their new homes recently built by S. A. Hopkins.

MEDOWELL HOME IS
DESTROYED BY FIRE

Home of Melvin Anderson near Medowell, was destroyed by fire, with much of its contents, Tuesday morning of last week. Loss is estimated at \$4,000, with no insurance.

The blaze was first discovered in the roof of the structure and it is believed that a bird or rat caused the fire. The home was of frame construction, with six rooms. A \$100 government bond was lost in the home.

R. R. Allen, postmaster at Weeksbury, spent the night here Monday, guest of O. H. Stumbo.

INSURANCE — ALL KINDS

PHONE 122 PRESTONSBURG, KY.

21 More Reasons

why the gas industry recommends

Electrolux

The Gas Refrigerator, to you

1. A TINY GAS FLAME DOES ALL THE WORK

This simple little gas burner gives you dependable, trouble-free refrigeration and takes the place of all moving parts.

2. DEFROSTS WITHOUT STOPPING

Temperature rises only enough for defrosting, without interrupting the chilling process. Food is always protected. Defrosting regulator is conveniently located above ice trays.

3. INEXPENSIVE TO OPERATE

Flames about 1000 ft. of gas monthly. Savings in food bills actually more than pay for the operating cost of Electrolux.

4. USES NO WATER

Electrolux is air cooled. Installation requires only one simple connection to the gas line in your kitchen. And the Electrolux is ready for a long life of service.

5. LONG LIFE

Sturdily constructed of the very best materials and not a single moving part to wear.

6. NO VIBRATION, NO NOISE

With no moving parts, there is nothing to cause vibration or noise. Electrolux is permanently silent.

7. HARMLESS REFRIGERANT

The refrigerant—perfectly harmless—is hermetically sealed in steel.

8. PORCELAIN INTERIOR

The easy-to-clean quality of stainless white porcelain is known to every woman. Rounded corners and the absence of any seams add to the ease of cleaning.

9. A TWO-TEMPERATURE CHILLING UNIT

Automatically increases cooling action to keep food compartment at uniform low, no matter how quickly the temperature may rise.

10. TROUBLE-TRAY RELEASE

Simply lift the handle trigger and the most solidly frozen tray releases instantly without effort. No more sore knuckles or broken finger nails.

11. SPLIT SHELF

Gives added capacity and convenience to the spacious, well-placed Electrolux interior. Accommodates extra bottles, large glass and fruit, etc., without crowding.

12. SOUNDLY CONSTRUCTED

Nothing but the very finest of materials, the most skilled workmanship go into the construction of an Electrolux. These unusually high standards of quality are reflected in the dependability and long life of Electrolux.

13. TEMPERATURE REGULATOR

If occasion demands, extra fast freezing for ice cubes or frozen desserts, this temperature regulator provides it.

14. SIMPLE FREEZING PRINCIPLE

The Electrolux freezing method is almost as simple and dependable as nature's own. A tiny gas flame circulates the refrigerant—ordinary air cooled. That is all there is to it, and time has proved its success.

15. CONSTANT, STEADY COLD

An Electrolux affords unequalled protection for foods, because its operation is constant. Cold remains uniform twenty-four hours a day.

16. AUTOMATIC GAS SHUT-OFF

Gas instantly shuts off if, for any reason, the flame should be extinguished.

17. NONFITTING SHELVES

All containers stand firmly on Electrolux flat, ribbon-like shelves. Shelves are arranged for easy accessibility, too.

18. INDIVIDUALLY TESTED

Each Electrolux must pass many tests in construction. Each unit is individually tested before it leaves the factory.

19. RECOMMENDED BY THE GAS INDUSTRY

Electrolux is endorsed and recommended by the entire gas industry whose century of faithful service has won the confidence of 15,000,000 families.

20. PLENTY OF LARGE ICE CUBES

Always day or night, there is a plentiful supply of pure ice cubes. The steady cold of an Electrolux promotes fast freezing—a convenience every housewife will appreciate. The large trays are convenient for chilling salads or desserts.

21. CONVENIENT FLAT TOP

Provides additional shelf room. Convenient, also, as a resting place for food to be stored in refrigerator or being removed.

WHY ELECTROLUX GIVES YOU MORE

Electrolux is NOT just another refrigerator—not simply a refrigerator differing in minor details from others. The engineering principle behind Electrolux represents the greatest advancement ever made in automatic refrigeration.

This advanced, simpler freezing principle of Electrolux gives it many advantages. To you, these features represent greater safety of operation, longer life, freedom from costly repairs, more uniform refrigeration, lasting satisfaction.

But these things may seem almost unbelievable at first. If true, however, the careful conclusive reason for choosing Electrolux. You can easily satisfy yourself that they ARE true. Ask your gas company or your local Electrolux dealer WHY they recommend Electrolux.

Ask HOW the entire gas industry satisfied itself about the superiority of Electrolux. Then judge for yourself how much more Electrolux gives you than any other refrigerator.

Wicker Says Lobbyists As Egyptians At The Red Sea

The gentleman from Knott—and his remarks concerning the lobbyists in Frankfort seeking special privilege, recently when he retaliated against Representative Guano, of Louisville, who was quoted as saying in effect that the Knott Representative would not know a lobbyist if he saw one.

J. B. Wicker is the Knott legislator, and his verbal tilt with Guano was precipitated by Mr. Wicker's remarks that lobbyists on the floor of the House are "as thick as Egyptians in the Red Sea."

The Courier-Journal's account of the Wicker-Guano fracas follows in part:

In the House today, speaking from a point of personal privilege, J. B. Wicker, Democrat, Knott county, took exception to a comment made at the Armstrong contempt hearing last night by Representative Guano that he "would not know what a lobbyist is."

"I admit I don't know so much," Wicker remarked. He added, however, that he had nothing to do with lobbyists and that "they don't find me."

"I represent the sentiment of the people that sent me here," Wicker continued, charging that an "insinuation" had been cast on 55,000 people in his county. He pointed out that he had been elected by a majority of 2,827.

"I never saw any lobbyist," he said, "and I never know any lobbyist. I don't know what a lobbyist is."

"I don't know what a lobbyist is," Wicker said, "but I don't put a knife in my back."

"Does the gentleman say I called him a fool?" Guano interposed.

Wicker replied he considered Guano's comment amounting to that. He added he "dared the gentleman from Louisville on any other man to question my integrity."

"It is true that I may not know so much," Wicker said, "I know I don't. But I have confidence in my right to know when lobbyists are attempting to fool me. Everybody knows that I vote my convictions. I do it without fear or favor of any set of men."

"I'll stand upon principle, as long as the Stars and Stripes float over this country of ours," Wicker declared.

Wicker said he had voted on every bill on its merits and had been identified with no faction.

"Don't get the idea that I think I'm smart," Wicker said, explaining that his trifling had been regretted in attending to business and that he intended to do that "so long as the stars keep their course in the heavens."

At the conclusion of Wicker's remarks, Guano said there had been a "great mistake" made, but not on his part.

Guano, who presided at the contempt hearing, said that during testimony as to lobbyists mention was made of Wicker's remark in the House that lobbyists were as thick on the floor of the House as "Egyptians in the Red Sea" before the real-

estate tax bill was reconsidered. Guano said there was a "derivative" laugh and that he pointed for order to stop person seeking employment. The lobbyist's much laughter because he respected Wicker so much.

"I said Mr. Wicker didn't know the difference between one lobbyist and another," Guano said, explaining that he meant Wicker was not acquainted with the lobbyists.

Guano said that he did that out of "deference," and out of "respect to the gentleman from Knott."

Guano and Wicker then shook hands and Wicker was given a standing vote of confidence in motion as W. B. Beckman, Democrat, Glasgow, accepted by them.

ASKS RELIEF FOR UNEMPLOYED MEN

Employers Requested To Call On Re-Employment Office Here for Labor

Employers in need of any kind of workers, common, skilled, domestic, clerical or executive, are urged to get in touch with the local re-employment office at Prestonsburg, which will send a qualified and competent worker to you without cost to employer or employee.

The re-employment office is the local re-employment office. In the past, many of the persons listed in the re-employment service have been absorbed by federal projects. Forces on the projects are now being drastically curtailed.

The purpose of this article is to point out the persons of this county who are in need of work. The re-employment service is prepared to furnish the name, work record and experience of employees to any one who may be in need of labor, whether he is skilled, unskilled, domestic, clerical or professional.

Whenever permanent or even temporary work is given it will lighten the load of the relief organization and help restore an entire family to a self-subsistence basis.

Already a number of the largest employers in the state have signified their intention of securing all labor from registers of the re-employment service. Recognizing the fact that a standardized government agency has the facilities to supply selected labor that will fulfill all requirements.

COLIE

Add England and Henry Backworth, drove enlisted in the C. C. C.

Adam England is planning on visiting his father-in-law, Lock Shepherd, of Goldsboro, Ky., over the week-end.

Colin Hughes passed away Sunday, March 18, at the Beaver Valley hospital, Martin. Burial was conducted by Rev. James Grogan.

Dull Headaches Gone Simple Remedy Does It

Headaches caused by constipation are gone after one dose of Adierlex. This cleans all poisons out of the system and lowers bowels. Gives better sleep, clears nervousness. — Hughes Drug Store.

Mrs. C. J. Hunschiller returned Saturday to her home in Ashland, and was accompanied by Mrs. B. P. Arnold and Mrs. Franklin Moore.

Mountain Range, Almost Directly Under Equator

Buwayrat, a mountain range in equatorial Africa, is unusual in its very situation. It lies almost immediately under the equator, and is very high, reaching 10,000 feet. It pushes its peaks up to eternal snow. Nowhere else are there comparable heights under the equator. It rises from the heart of a continent. The Andes of Ecuador, relatively close to the coast, and the mountains of the island of New Guinea, are the closest competitors.

Weather conditions do their part in contributing to the strangeness of this African mountain range and to throwing an almost threat of mystery around it. The peaks are hidden to observers from the plains and forests by clouds and fog except at rare intervals. As a result, the definite existence of the mountains was unknown to Europeans until 1884, when Sir Samuel Baker, while exploring Lake Abaya, saw a blue mountain to the south.

His observations went unverified until 1887, when Stanley saw the peaks and made known the fact. For the first time, then they were known. It was not until more than a decade later that the snowline was first reached and the peaks were attained until 1901, when the Duke of the Arundel led his expedition to the top.

St. Peter's Church Said to Hold Record for Age

The oldest church in the western hemisphere is St. Peter's church in the ancient capital of the Hellenistic St. George's. Founded in 1612 with a structure of native timber and rebuilt in 1618, St. Peter's has seen almost a century and a quarter of continuous religious service, almost half a century more than any other church on this continent in use today.

Its close neighbor is the cathedral of Mexico, built in 1607, and the Old South Meeting House in Boston, which was built in 1606. St. Luke's church in the Isle of Night, Virginia, is said to be the oldest church in the Americas, after doing service since 1632, and the First Church of Salem, Mass., constructed in the same year, was recently restored for religious service.

St. Peter's, in its history and within the church itself and its crowded, shady chancel, sums up the long and varied life of Bermuda. The very physical structure of the church reflects the change, social and political, of the island. For it has been added to and required many times to its long career. The first church was built of the native cedar, but in 1660 an old record, "it was blown down by a tempest so that he (the governor) built another in a more durable place of Palmetto leaves." This in its turn was replaced by a stone structure in 1670, much of the masonry being utilized in the present walls, which were raised in 1713.—Detroit News.

Carp Favored 5000 B. C.

Carp is one of the favorite fishes in Germany, and it was also the chief diet of the people who lived in Padua some 10,000 years ago. This is shown by finds connected with the cremation race which have been made at Tieserale in the Danube valley, near the ruins of Falkenstein castle. At a depth of about fourteen feet excavators have found a stratum nearly a yard thick which throws new light on the life of man in the Mesolithic age (about 5000 B. C.). Great quantities of carp bones were found, and some 10,000 remains of snails give evidence of the influence of the Mediterranean climate in that age. Among the many flat articles is a polished stone axe of the transitional period from the Mesolithic to the Neolithic age.

The Piano's Inventor

Bartolomeo Cristofori was an Italian keyboard maker and the inventor of the hammer action used in the modern pianoforte. He was born in Padua about 1615, and early served as an apprentice to an instrument maker. After following that work for some years in Padua he began to be known elsewhere. About 1687 Prince Ferdinand, son of Grand Duke Cosimo III, persuaded him to remove to Florence. It was during the Florentine period that he made the first pianos. Descriptions and engravings of the time show that the invention is correctly ascribed to him. A grand pianoforte by Cristofori is said still to be preserved in Florence. He died in that city in 1700.

Small Rattlesnake

The rattlesnake (Sistrurus catenatus) is a true but small rattlesnake which formerly was very numerous in swampy woods in southwestern Ontario, and may still be found there in the wilder places. It rarely exceeds 20 inches in length. Bites occur but are of less importance north of Lake Erie of the timber or banded rattlesnake of the United States, but they are not as venomous.

Wine Cellar Under Church

The old university town of Heilbronn, so rich in attractions, possesses one known to few visitors. It is a wine cellar under the Catholic church of St. Anna, containing, among other large casks, the "Fahle Cask" of 1586, the five hundredth anniversary of the university, with a capacity of 4,612 gallons.

SHERIFF'S SALE

By virtue of Execution No. 3210 di-
rected to me, which issued from the
clerk's office of the Floyd circuit
court in favor of Kentucky Whole-
sale Company against Melvin Martin
and under further authority of a
warranted process issued from the
said clerk's office, March 13, 1934, I
or one of my deputies will, on Mon-
day, the 2nd day of April, 1934, be-
tween the hours of 10 o'clock a. m.
and 4 o'clock p. m., at the courthouse
door in Prestonsburg, Floyd county,
Kentucky, expose to public sale, to
the highest and best bidder, the fol-
lowing property, or so much thereof
as may be necessary to satisfy said
judgment, interest and cost, to-wit:

All the right, title and interest
of Melvin Martin in the following
described tract or parcel of land
lying and being in Floyd county,
Kentucky, on the left fork of Beaver
Creek, and being the same land
conveyed to the said Melvin Martin
by E. B. Martin and others, by
deed bearing date February 20,
1929, recorded in deed book 81,
page 323, Floyd county, which deed
describes two tracts of land, but
said tracts constitute one contin-
uous homestead, according to said
deed from said sale, \$10,031 and
cost of this advertisement.

Levied on as the property of Mel-
vin Martin.
TRUSTEE: Sale will be made on a
credit of three (3) months, bond with
approved security required, bearing
interest at the rate of six per cent
per annum from day of sale, and
having the force and effect of a Replevin
bond.
Witness my hand this 13 day
of March, 1934.

M. T. STUMBO,
Sheriff Floyd County.

SHERIFF'S SALE

By virtue of execution No. 2967 di-
rected to me, which issued from the
clerk's office of the Floyd circuit court
in favor of C. S. Wilson, Bankers
Commissioner, etc., against T. A.
Bates, J. P. Akers, J. S. Franklin,
and by further authority of a writ
of replevin, which issued from
said clerk's office on March 13, 1934, I
or one of my deputies will, on Mon-
day, the 2nd day of April, 1934, be-
tween the hours of one o'clock p. m.
and two o'clock p. m., at the courth-
ouse door in Prestonsburg, Floyd
county, Kentucky, expose to public
sale, to the highest and best bidder,
the following property, or so much
thereof as may be necessary to sat-
isfy plaintiff's debt, interest and cost,
to-wit:

Served the within execution by
entering and levying upon the
property and advertising for sale,
the following tract or parcel of
land situated on the waters of Left
Beaver Creek, Floyd county, Ken-
tucky, bounded on the east by S. S.
Meylin and Anna Martin; on the
north by the land of J. P. Salisbury,
and Mary Halbert (the heirs); west by the land of Mary
Allen, J. P. Patton and Sam Clark's
heirs; and on the south by the land
of J. P. Salisbury and Richard
Salisbury.

Levied on as the property of J. P.
Akers. To satisfy the execution of re-
plevin in the sum of \$292.00 with inter-
est at six per cent from October 22,
1933, until paid, and the further sum
of \$10.05 cost. Subject to a credit of
\$292.00 paid August 8, 1932.

TRUSTEE: Sale will be made on a
credit of three (3) months, bond with
approved security required, bearing
interest at the rate of 6 per cent per
annum from day of sale, and having
the force and effect of a Replevin
bond.
Witness my hand this 13th

MAYTOWN

Mrs. Jones and K. Moore, of
Maytown, were visiting relatives. Kid
friends here Saturday.

Hansel McQuinn spent the week-
end with his mother in Kenova, W.
Va.

Miss Lennie Martin was the guest
of Miss Edith Allen, of Garth, the
past few days.

George Edward Allen accompanied
the bull squad to Lexington for the
state tournament, spending the time
with his brother, Claude Allen,
a student at the University.

Mrs. J. H. Allen and daughters
were shopping in Pikeville Saturday.

Miss Shirley Allen, of Glo, spent
the week-end at home with her
parents, Mr. and Mrs. G. A. Allen.

Mrs. E. B. May spent Monday in
Martin.

Miss Edith Allen, of Garth, is the
guest of Miss Lennie Martin.

Health Club Organized
A health club for mothers was or-
ganized at school Friday afternoon.
In connection with the free lunch
feature which has been under way for
some time. A large number of moth-
ers attended.

Young People's Meet Postponed
Owing to the condition of the
roads, the meeting of the young peo-
ple of the Sandy Valley conference,
due to be held here March 19, has
been postponed until the evening of
April 2.

Team Takes Trip
Coach Wiley Jones, Frank and
Claude May took the basketball boys
to Frankfort over the weekend-end,
also attended the state tournament in
Lexington, where the team supported
the line fire, representatives of this
region.

BETSY LAYNE YOUTH
ENTERS U. S. MARINES
Macon, Ga., March 10 (Sp.)—The
enlistment in the U. S. Marine Corps
of Wilbur Miller, son of Mr. and
Mrs. George W. Miller, of Betsy
Layne, is announced by Lieut. Col. H.
W. Stone, officer in charge of the dis-
trict recruiting office, Macon municipal
Auditorium.

Mr. Miller was one of 10 high
school graduates enrolled from Ken-
tucky during the first three days of
March. He is a graduate of Betsy
Layne high school, class of 1931.
During his enlistment he will be as-
signed to sea or foreign duty, with
exceptional opportunity for travel
abroad.

W. H. May, Jr., of Ashland, is
spending a few days here on business
this week.

The Road To Better Health
By Dr. William J. Scholes
We are now in the middle of the
its garden-spot for these germs.
Again when rheumatic fever, or in-
flammatory rheumatism, is greatly
in evidence. The reason the disease
occurs especially during this time is
the same as that which explains why
effect upon the disease. More recent
studies have, however, disclosed that
the most attached to these drugs was
purely imaginary that real. They are
still being used, but with the knowl-
edge that their action is simply that
of relieving pain and reducing fever
and that actual recovery from the
disease process itself is purely a
matter of time.

Complications of Rheumatism
A very large percentage of cases
of valvular (organic) heart disease
infection grows in the gums or some
other focal point. Whatever may be
the focus, the germs find their way
into the blood stream. Having a pur-
pose called rheumatism. But while generally the joints exhibit
the streptococcus which causes rheu-
matism sometimes during February,
March and April.

Rheumatism Self-Inflicted
For some time prior to an attack
of inflammatory rheumatism the pa-
tient complains of "sore throat" at
rather frequent intervals and an ex-
amination shows the tonsils to be in-
flamed in many cases. Sometimes the
infection grows in the gums or some
other focal point. Whatever may be
the focus, the germs find their way
into the blood stream. Having a pur-
pose called rheumatism. But while generally the joints exhibit
the streptococcus which causes rheu-
matism sometimes during February,
March and April.

The invasion brings about an in-
flammatory reaction in these ar-
ticular symptom complex that re-
sults a called rheumatism. Why the
disease is called rheumatism. We
know not, nor is it material. Par-
aphrasing the poet's reference to
pain, the disease would be just as
painful by any other name.

Rheumatism Self-Inflicted
Being an infectious disease, rheu-
matic fever is self-limited. That is to
say, it pursues a definite course and
only the natural forces at work with-
in the organism play any real and de-
cise part in its eventual course.
Anything done to or for the patient
can be regarded only as palliative—
relieving pain, controlling fever, pre-
venting complications.

Perhaps, the greatest good we can
do is to prevent future attacks by
weeding out the germs wherever they
may be growing. For example, by
removal of the tonsils frequently does

ADVERTISEMENT FOR BIDS

Prestonsburg, Ky.
March 20, 1934

TO WHOM IT MAY CONCERN:
Notice is hereby given that the fiscal court of Floyd county will elect a county treasurer at or about the hour of 10 o'clock a. m., on April 3, 1934, at the courthouse in the court house in the city of Prestonsburg, Floyd county, Kentucky. Persons de- siring to be elected to said office shall file with A. B. Meade, clerk of the

Floyd fiscal court, on or before the date aforesaid, sealed bids setting forth the terms and conditions under which they will accept said appoint- ment or election.

On said date said court will open and examine all bids submitted and will elect as such treasurer that per- son whose bid is restricted by said court as being the lowest and best bid, provided the person making said bid possesses the qualifications re- quired by law.

Said applicant must be in position to execute bond with at least two good sureties to be approved by the fiscal court to be conditioned accord- ing to law.

FISCAL COURT OF FLOYD COUNTY.
BY FORREST D. SHORT,
County Attorney

Mr. and Mrs. J. B. Clarke and children went to Louisville Friday. Upon their return Saturday they were accompanied by Mr. and Mrs. H. C. Francis. Mr. Francis has been taking medical treatment in Louis- ville.

World Eastern Country

The name, Mountains of the Moon, is believed to have arisen from a mis- taken translation from Arabic; but it is still a mystery that has surrounded Ru- wenzori for centuries and it has a mys- terious justification because the solid appearance of the mountain slopes. The relatively few white men who have made the ascent claim to have all the impression that they had blundered into some alien world. The combination of excessive moisture, air, and equatorial sun has produced a unique vegetation that in many ways is utterly fantastic.

After emerging from the dense trop- ical forests of the lower slopes, a traveler finds like a European visit- ing the mountains of Brodiaeana. He walks among peculiar plants, some tall, thick, "bamboo-like," true, his height, and heather plants, refugees of the low Scottish shrubs, that have expanded into great trees, 20 and 30 feet tall. To add to the weirdness, col- ored mosses—brown, yellow, green, white and red—are all about under- foot and overhead. They grow in huge cushions that encircle the limbs of the heath trees like giant mushrooms im- piled on a stem. The mountain is in- jection is highland country for foot- through which the strange growths loom dimly; and there is a continual drip of water from bushes and moss- clumps. (Montreal Family Herald.)

Eagle Won on First Coin

Issued by United States
When the bald eagle was up for dis- cussion as to its being placed on the seal of the United States, says Frank- tic American, Benjamin Franklin op- posed it and offered the American wild turkey as being more distinctly Amer- ican than the European eagle. The eagle won and was adopted on June 20, 1782, as an emblem for the great seal; it was not placed on the first coin issued by the United States, in 1795.

This same old bird has been held in reverence and superstition by the natives as well as used in symbolism, and heraldry, and depicted in all methods of art—agriculture known in the North American wilderness back in prehis- toric times.

As one of the outstanding totemic animals, the eagle gave its name to many clans, tribes, and families, religious and otherwise. In North America, nearly every clan or group had an eagle emblem on its banner or in its history—it was depicted on pottery, baskets, textiles, handwork, quillwork, shields, crests, totem poles, house and grave posts, pipes, whistles, and nearly all objects pertaining to cult and ceremony of many old tribes.

Darkness Makes Plants Greedy

When night comes, plants go to sleep, says Popular Mechanics Maga- zine. That is, in the sense that during darkness one of the principal life ac- tivities of all plants is suspended, that of manufacturing starches and sugars from water and carbon dioxide. All plant life, with the exception of cer- tain lower forms, is dependent upon sunlight for growth. The green color- ing matter of the plant, chlorophyll, is able in some mysterious manner to utilize the radiant energy of the sun- shine in the formation of raw mate- rials for the plant's growth. The car- bon dioxide of the air and the nitro- gen from the soil, plus sunshine, are the basic materials from which all vegetables, trees, fruits and flowers of the sun are fabricated. When nat- ure turns off the sunlight each day, the process, called photosynthesis, stops. The sunlight factory closes up. In this respect the plant may be said to sleep, although the sunniest made during the day are used during the night by various parts of the plant.

Cradle of Deep a Tomb

Ocean depths, instead of being in- habited by strange monsters, actually contain only bacteria and minuscule microscopic marine plants, according to a scientist, says Popular Mechanics Magazine. Fish and other organisms comparatively high in the scale of life could not live at great depths, the scientist asserts, because they could find nothing to eat and because the temperature would be unhealthy. Complete darkness, tremendous pres- sure and a low, constant temperature of about zero to three degrees centi- grade are the conditions on the ocean's floor, and fish would be able to adapt themselves to the pressure and ab- sence of light, but the low temperature would reduce greatly their metabolism. Much of the food in the "cradle of the deep" would be of no service, since fish and crustaceans have not the abil- ity to extract dissolved organisms from the sea water.

Bears Are Beggars

There are three stages through which a bear passes, according to an author- ity. The first is a fear of man, from which he runs when he meets him in the wild. He next learns that man, who is really harmless, has the things he likes to eat. Eventually he learns that man is afraid of him, and will only give him these things when forced to do so. It is then that he becomes dangerous, and must be put out of the way by the proper authorities. Not only that, but he becomes a beggar bear, haunting the highways for pass- ing motorists who will give him the tidbits he loves, and neglecting to tend for the food that builds a bear up for the long hibernating period, preferring the cake and chocolate he is sure to get from the tourists.

WATER SYSTEM FOR \$40

J. L. Reeder, a Marshall county farmer, installed running water for his house, barn, poultry house and 125 trees or 240. A survey made by R. G. Welch, farm engineer, for the College of Agriculture, University of Kentucky, and County Agent E. P. Dichter, revealed that a spring 1,500 feet from the house was 10 feet higher than the ground level of the house and this water could be run to the farmstead by gravity. A supply tank furnishes a reserve storage for water when needed in large quanti- ties over a short period of time. Ma- terials were purchased from a work- ing concern, and were installed by Mr. Reeder.

Mr. and Mrs. J. R. Hurt left Fri- day for a visit with relatives at Tazewell and Gate City, Va.

CARD OF THANKS

Words cannot express our deep appreciation and thanks to our many friends, relatives and neighbors for their loving kindness and words of cheer and sympathy during the illness and death of our beloved little daughter, Joan Carol Rice, and seven weeks, when God took from us and claimed for his own on March 7. Es- pecially do we want to thank the hospital staff and nurses of Paints- ville hospital for their kindness, also Mrs. Meade for her comforting words. May God bless you all.

THE FAMILY
Van Lear, Ky.

NAME OMITTED

Name of Maudie Hittick was omitted, through error, last week from the list of pupils at the funeral of Mrs. Elizabeth Maynard.

MRS. STURGILL HONORED

UPON LEAVING GARRETT

Garrett, Ky., March 22.—(Sp.)—On Tuesday evening several ladies of Garrett leave a surprise party at the home of Mrs. Rudolph Spencer in honor of Mrs. Troy B. Sturgill, who is moving to Prestonsburg this week. After the guests had arrived, Mrs. Sturgill was summoned to the Spencer home. Games and contests formed the dis-

version of the evening in which Esther Van Bockern, was crowned high score prize, and Mrs. J. E. Sturgill was crowned queen prize. A delicious refreshment was served to the following guests: Mrs. J. E. Damper, Mrs. Sturgill, Mrs. J. E. Martin, Mrs. E. Murray, Mrs. Henry Childers, Mrs. Ben Muske, Mrs. H. H. Hornsby, Mrs. A. Roache, Mrs. G. E. Gault, Mrs.

Robt. Barker, Mrs. E. G. Beverly, Mrs. W. M. Baskin, Mrs. Bill Baskin, Mrs. J. E. Baskin, Mrs. J. E. Baskin, Mrs. Robert J. Baskin, Mrs. B. H. DePriest, Mrs. Olla Kilburn, Mrs. Raymond Turner, Mrs. William May, Mrs. Chas. Bercaly, Mrs. James Pack, Misses Alpha Morgan, Audrey Sturgill, Frances Lafferty, Ruth, Edna, Jackie Moore, Esther Van Bockern, Joy Baskin and the hostess.

Club Leaders, Officers In Training Conference

Leaders and officers of seven Floyd county 4-H clubs met here Saturday at a training conference. Attendees: Lila Paine, Prestonsburg, Dwaile, Marytown, Betsy Layne and Harold clubs were represented.

J. M. Bellinger, assistant state club leader, discussed club programs and project work. Miss Anita Burdick, field agent in girls' club work, was also present. The meeting was called by County Agent S. L. Isbell.

WANTED—practice piano. Write cash price, with full description. P. O. BOX 85, W. Prestonsburg, Ky.

WHITE CROSS SEAL
DRIVE IS EXTENDED

Campaign to Help Crippled
Children To Continue in
County Till April 1

Report made this week by County
Agent S. L. Isbell, secretary-treasurer
of the White Cross Seal committee
now making a drive on seal sales
throughout the county, indicated that
the campaign will be successful and
that Floyd county will reach its
quota of \$300. The drive has been ex-
tended to April 1.

Funds derived from the seal sale
go to further the work with
crippled children. At present 87 crippled
children in the county are being
treated and 41 have been discharged
as cured.

The Business & Professional Wom-
en's Club, under the leadership of
Vivian McCombs, Anna Martin and
Victoria Spradlin, is sponsoring the
seal sale in Prestonsburg. Splendid
results have been obtained in the
sale of seals here. School children
are exhibiting eagerness to aid their
unfortunate companions who cannot
read and play because of crippled
limbs. With this urge to stimulate
them, the well children are working
like Trojans to sell the White Cross
Seals.

Very soon, the Women's Club here
will give a benefit performance to
raise funds for the crippled children,
this being one of the club's chief ob-
jectives of the year. The following
compose the committee: Mrs. F. L.
Helms, chairman; Mrs. E. P. Hill,
Mrs. Olla Davis, Mrs. N. L. May
and Mrs. J. D. Thomas.

George P. Archer returned Satur-
day to his home here from Hunting-
ton, W. Va., where he has been tak-
ing medical treatment for some time.
Mr. Archer has been ill for several
months, but his condition now shows
considerable improvement.
